**Performance of the private corporate business sector during Q2:2021-22**

Today, the Reserve Bank released data on the performance of the private corporate sector during the second quarter of 2021-22 drawn from abridged quarterly financial results of 2,716 listed non-government non-financial (NGNF) companies. Data pertaining to Q2:2020-21 and Q1:2021-22 are also presented in the tables to enable comparison. The data can be accessed at the web-link [https://dbie.rbi.org.in/DBIE/dbie.rbi?site=statistics#!2\\_42](https://dbie.rbi.org.in/DBIE/dbie.rbi?site=statistics#!2_42).

**Highlights**
**Sales**

- Demand conditions in the manufacturing sector improved in Q2:2021-22 as the economy transited into the recovery path, after the restriction related to the second wave of the COVID-19 pandemic were eased; sales of 1,687 listed manufacturing companies recorded steady and broad-based growth of 34.0 per cent on an annual (y-o-y) basis (Table 2A and Table 5A).
- Sales growth (y-o-y) of information technology (IT) sector companies, which remained in positive terrain throughout the pandemic, accelerated to 19.5 per cent in Q2:2021-22 from 17.5 per cent in the previous quarter (Table 2A).
- Sales of non-IT services companies expanded by 27.0 per cent in Q2:2021-22, *albeit* boosted by favourable base effects (Table 2A).

**Expenditure**

- Manufacturing companies increased their expenditure on raw materials in tandem with the surge in sales during Q2:2021-22 (Table 2A and Table 5A).
- Staff cost growth (y-o-y) also increased across sectors during Q2:2021-22 (Table 2A).

**Operating profit**

- Rising turnover contributed to higher operating profits of manufacturing companies in Q2:2021-22 (Table 2A).
- Operating profits of services sector companies (both IT and non-IT) also expanded (Table 2A).

**Interest**

- With reduction in interest outgo and rise in profits, interest coverage ratio (ICR)<sup>1</sup> of manufacturing companies increased to 8.7 in Q1:2021-22 (7.5 in the previous quarter); the ICR of non-IT services companies remained below unity (Table 2B).

**Pricing power**

- Pricing power in terms of operating profit and net profit margins remained stable for manufacturing and IT companies (Table 2B).

<sup>1</sup> ICR (*i.e.*, ratio of earnings before interest and tax to interest expenses) is a measure of debt servicing capacity of a company. The minimum value for a viable ICR is 1.

**List of Tables**

| <b>Table No.</b>  |   | <b>Title</b>  |  |  |               |
|-------------------|---|---|--|--|---------------|
| 1                 | A | Performance of Listed Non-Government Non-Financial Companies                                      |  |  | Growth Rates  |
|                   | B |   |  |  | Select Ratios |
| 2                 | A | Performance of Listed Non-Government Non-Financial Companies – Sector-wise                        |  |  | Growth Rates  |
|                   | B |   |  |  | Select Ratios |
| 3                 | A | Performance of Listed Non-Government Non-Financial Companies according to Size of Paid-up-Capital |  |  | Growth Rates  |
|                   | B |   |  |  | Select Ratios |
| 4                 | A | Performance of Listed Non-Government Non-Financial Companies according to Size of Sales           |  |  | Growth Rates  |
|                   | B |   |  |  | Select Ratios |
| 5                 | A | Performance of Listed Non-Government Non-Financial Companies according to Industry                |  |  | Growth Rates  |
|                   | B |   |  |  | Select Ratios |
| Explanatory Notes |   |   |  |  |               |
| Glossary          |   |   |  |  |               |

**Notes:**

- The coverage of companies in different quarters varies, depending on the date of declaration of results; this is, however, not expected to significantly alter the aggregate position.
- Explanatory notes detailing the compilation methodology, and the glossary (including revised definitions and calculations that differ from previous releases) are appended.
