- 2. At present, while computing capital requirements for counterparty credit risk, the following exposures, wherever allowed to be undertaken, are exempted or capped:
  - a) foreign exchange (except gold) contracts which have an original maturity of 14 calendar days or less are excluded from capital requirements for counterparty credit risk.
  - b) 'sold options', provided the entire premium / fee or any other form of income is received / realised, are excluded from capital requirements for counterparty credit risk.
  - c) For Credit Default Swap transaction where bank is protection seller, the exposure is capped at the amount of premium unpaid by the protection buyer.
- 3. We have received queries from regulated entities (REs) regarding the applicability of the above exemptions / caps under the Bilateral Netting framework. In this connection, it is clarified that:
  - a) the exemption for foreign exchange (except gold) contracts which have an original maturity of 14 calendar days or less shall be applicable to entities calculating the counterparty credit risk under Original Exposure Method without taking the benefit of bilateral netting. Accordingly, the exemption would be applicable only to Regional Rural Banks, Local Area Banks and Co-operative Banks, where the bank has not adopted the bilateral netting framework. For other entities, the exemption shall stand withdrawn.
